EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Non-elected claims 25-29 have been CANCELED without prejudice.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 15: These claims have been allowed because applicant incorporated therein the allowable subject matter noted in the first Office action (i.e. *a handle for rotating the needle removing fixture, and a needle removing fixture which is rotatably mounted to the container top*).

Regarding claim 21: In applicant's remarks filed April 19, 2004, it was noted that claim 21 was "amended to include the elements of allowable claims 4 and 6." To the contrary, amended claim 21 does not include the combination of a handle and a needle removing fixture which is mounted to the container top. In fact, neither of these limitations are included in amended claim 21. However, the claim as now amended recites that the needle is disconnected from the hub *without shearing* of the needle, by *rotating* the needle in a needle removing fixture, and is *deformed* during the rotating process to prevent reuse thereof. At least three references teach rotating a needle to remove it from a hub without shearing of the needle (see U.S. Patent

Art Unit: 3726

Nos. 4,986,811 to Thead et al.; 5,312,346 to Han; and 5,573,113 to Shillington et al.), but fail to teach the recited deformation. Case (U.S. Patent No. 5,351,381) teaches deformation of the needle and removal without shearing, but fails to teach the recited rotation (the intermeshed gears **22** and **28** simply crimp the needle rather than rotate it). Szablak et al. (U.S. Patent No. 4,531,437) teach rotation of the needle and hub, but fail to teach the limitations of “without shearing” and deformation of the needle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
